

*Officials from the Louisiana Department of Wildlife and Fisheries recently surveyed the Woodlands Trail located on F. Edward Hebert Boulevard. From left are Judy J. Jones, Contractor for Natural Areas Registry, Louisiana Natural Heritage Program, LDWF; Chris Reid, Louisiana Natural Heritage Program Botanist; Patti Faulkner, Louisiana Natural Heritage Program Ecologist, Habitat Section, LDWF; and Ines Maxit, of the LDWF. The survey will provide trail organizers with a valuable "picture" of the urban forest in Belle Chasse. When their surveys and inventories are complete, information regarding the various species of wildlife and the types of vegetation that live on the property will be available. Trail organizers say the information will be incorporated into interpretive kiosks once the trail is constructed.*
